

# Chair Side Custom Stains

*We specialize in beautiful anterior restorations that look like they belong in your patient's mouth*

Matching one tooth is the most challenging task the dental team has to deal with. By doing a custom stain, you avoid numerous seat appointments to get the perfect match.

## **What is a custom stain from Alpine Dental Designs?**

Andreea, the owner, will come to your office at the time of the seat with the completed crown, an oven and a staining kit. If needed, she will add characterization and/or color directly into the patient's mouth for a nearly perfect match. The crown is then fired and is ready to seat.

She can also add porcelain to contacts, black triangles and incisal edge.

The majority of the time, minor or no changes are needed.

## **What we require from you**

Please include a pre-op photo (a smart phone photo is ok)

Have your patient make an appointment with the lab for shade verification and photographs.

After we see the patient, we will notify your office so that the seat appointment can be scheduled between the patient, Andreea and the doctor.

Please, DO NOT schedule the seat appointment without first coordinating it with the lab.
